

GLOBAL MEDITATION FOR FUKUSHIMA

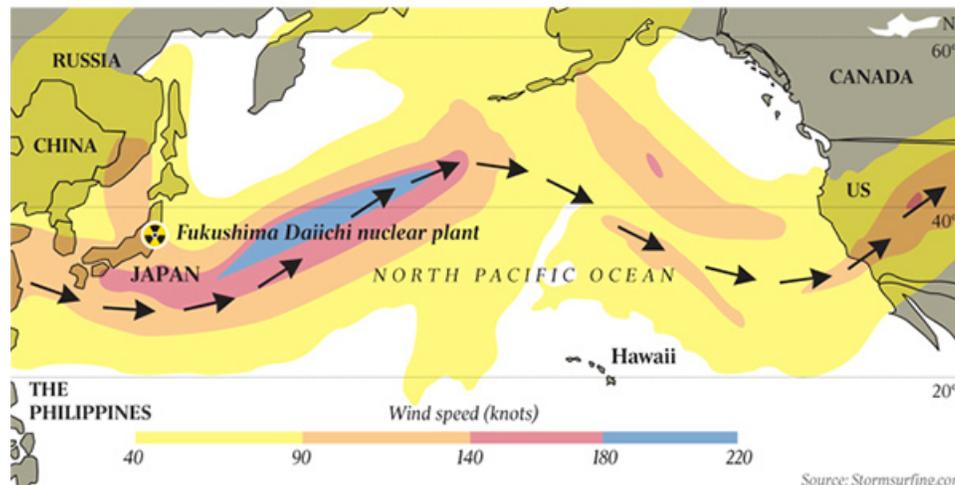

Why Fukushima? Why now?

In less than 60 days the Japanese will be attempting to remove over 1,100 the spent fuel rods from a very badly damaged reactor 4. These rods are currently hanging 100 feet in the air and are brittle and damaged. The containment system they are housed in has been described as a crumpled cigarette box. The containment system contains zirconium alloy which is highly flammable. There are over 11,000 rods currently on the Fukushima site. It is critical that this task to remove these rods be done immediately as the building is ready to collapse, and if this task is not done to perfection a fire could start causing an explosion which would send a stream of radioactive debris 14,000 times the strength of Hiroshima around the northern hemisphere for centuries.

This is a very critical juncture in humanity's future.

THE NORTH PACIFIC JET STREAM

Forecast for the 48 hours to 6pm GMT Thursday (5am Friday AEST)

350 tons of radioactive water have been pouring daily into the Pacific Ocean for two years now, and 100% of the tuna caught off the coast of California that has been tested has been found to be contaminated with radiation from Fukushima. Additionally, three of the cores at Fukushima have gone missing. **No one knows where they are.** It is clear to everyone watching these events unfold that TEPCO - who created this disaster in the first place - does not have the expertise nor the resources to carry out such a delicate and dangerous task, yet they are refusing any outside help and are determined to go it alone in this extremely dangerous endeavor. The UN is currently being petitioned to force Japan and TEPCO to allow outside help to step in.

The fate of humanity - and indeed the fate of all life on earth - hangs in the balance here, and if ever there was a time for humanity to come together as one it is NOW. A global meditation is currently being planned to take place prior to the onset of this unprecedented event, and will continue daily until the rods have been removed successfully.

Please join us. Your life and well-being are at stake too.
